My Dear Eglemann

Gillman writes me that he is very full for March nr. of the Journal. Whether he will print mine than Parry's Sketch is yet uncertain: but I hope to get in the Comparison, Ramus. — Bracif. which are ready. For you will have time about the pines, — but I should have all the MSS. by the end of Feb?

W. Starker tells me that at the June Primulas they cannot

Distinguish Jno. D. Rivalis of Liberia.

Here is a pretty go. Brisben sends to a Merchant, Virginia at Monrovia a parcel for me, — which I, like an ass forwards as a separate consignment to Liverpool & there by Steamer, — and the charges when the parcel reaches me are $ 8.45.

The parcel contains only Brisben Plants of a Grass in Transcaucasia & Persia — printed in Moscow. — a

Wilkes Exp. Expd — Botany.
Vol. 1. of Phaenogamia &
atlas of 100 plates was
published long ago. You
must have seen them
here. — They contain perhaps
nothing to interest you.

I shall be sorry if
Shaw loses his case
I have just heard from
Brisbane. I have sent to
him proofs of the Letters from
of Chapmans Euphorbiae
and have written to C.
to have him send B. Species
names in letters, to make out
his new species, C. is
will be interested, but very
dilatory. If you know
what Chapmans n. sp.
are tell Brisbane.

Hendricks MX is not here yet. Pray what would was it sent? How is H.? Would he now like to collect in Arizona or Utah, & the interior of California? Brisbin, the Paris Museum & others all ask for plants from there. — from the good Dr. Hunt Wyo to buy a very handsome pair to H. if he will collect in those regions. I do not like to send Hendrix about it till I know how H. is disposed. Through Stanley at Washington we could get some appointments for H. I suppose, if he could take them.

Do you think there is no use in running Bates. There is none, if he can't help do himself. Will, we have to fall back on Seward & General Scott. Missouri will be a great State some day, when you are rid of the incubus. Love yours

Jany 24th/1837

Your favor of 20th Inst.
I. came to hand.

You Bell — over — Heart
Great was known little about
Rhipsalis.

Your drawing looks very
perspicuous, and answers
to the description of the
Paper as much authors
understand it, — not as I
do: for in your sketch
the dispositions are
opposite, and the placentae
truly parietal.

The volume of the
Munich academy, con-
taining Zuccarini's Cactus
paper bears date
1837.

Rec'd Jan 22
Ans'd Feb 4 Cambridge, 15th Jany. 62.

My Dear Engelmann.

When yours came to-day I was busy trying to get rid of Parry's plants in order, for bill. Torr, to which I had already sent Harry's sketch. I have applied for room to get the whole into the March, no. — but if I get it, I suppose I shall not be ready, for Torrey has as yet made no sign.

I suppose I shall get in only the Compositæ, with perhaps a part of the Polypetalæ, — but I could have the rest set up & in proof-slips, by March, if you send in your ~~names~~ lists.

I have plenty of Gentiana acuta — mostly tall forms — but all glued down. I have fished a lot of Bursaria from, & shucks of Lapi. — I send also what I call ~~G.~~ G. procumbens, which

I hope ~~will~~ not to be broken
in transiten.

I fear the "tuttu of the pliee"
in the Arenmunthe group are not
very reliable. — at least I thought
so when working at them years
ago.

Geochroleuca I used to
have in garden here, but it is
lost. I send two good flowers.

Abies alba I learned to
know by going to Lucke.
It is a well-marked species
— very distinct from A. nigra
& from its range very likely
to grow in Rocky Mts.

Thanks for the names of
misprints in the Pl. Exp.

Jersey is uncertain in
writing — just in the way
you suppose
I do not know his age, say

MISSOURI BOTANICAL GARDEN

I feel much sorrow at
the suffering in Missouri.
It should have been avoided
by the prompt & complete
rally of all Union men
at the first to put down
traitors. — as I think.
You on the spot know all
the difficulties & troubles, &
I ought not to consider that
you take a different view,
But I cannot consciencitiously
take any other. Time will
show which is right, and
we can amicably refer
all to its decision,
My brother in law, & his
cousin are both officers in
Burnside's Expedition. —
which we expect will do
something.
Mrs. Gray & I send warmest
New Year greetings to you
& Mrs. E. & hope you may pass
all right & country safe, in 1863.
Ever Yrs A. Gray

MISSOURI BOTANICAL GARDEN

Though Richardson & others would tell me that A. alba was very distinct from A. nigra I could get no satisfaction till I went to Quebec. Seeing it all is clear. The aspect of the tree and the hue of the foliage is very like A. balsamea, and the cones cylindrical. Its range is much more northern than nigra. and in N. England it is only in N. parts & on the mountains. So I should expect that at, rather than nigra on Rocky Mts. And I have from N. Rocky Mts. called Bigelow an just the most common plant. The cones enclosed are from mt Mansfield Tree. The leaves partly, & bracts from Rky Mts. Bourgeau. The stomas and even, rather than

thin & sphaculate edge of the scales is characteristic of alba. Haydenii one. with fine shape and the thin edges of scale, = nigra. of alba leaves less slender than nigra The tree in our garden, and wild about here is a pale-leaved variety of nigra, some of the Cambridge Botanical Garden Angelmann Papers Forbes.

Thro. Durand of Philadelphia I have sent all I can find I have to Durieu. Give me the locality and I will perhaps get the Minnesota species collected. We have it from Kennebunk, on the coast Wright is now near to Havana. Very comfortable - I think means to stay in Cuba yet.

Bravo for Illinois. to which victory at Ft Donelson is due. and Bravo for Tennessee

and Alabama, full of Union
men! Does not your old
Union blood rise? Pray, now
drop all your let_treasun-
able, do-nothing, disorganiz-
ations, and go in for the
Country, the whole country,
-reinstate it first, and then
we will all go in and make
it what it should be. The
ingenerous conduct of England
shows what a condition we should be in
as a practical & the playing
off one portion against the
other, and bullying both,
I pray Congress to put on
taxes - 5 pr. cent direct on
property & income, and learn
indirect besides. What is prop-
erty? I would fight till every
cent is gone" - and would offer my
own life freely: for I do not value
the lives of property & rebels above
my own.
God bless you.
Ever Yours Abraham

Rec'd April 10th
Ans May 1st Cambridge, 5th April, 62.

Dear E,

Your copy of Lib. Amst. fusc. Capsantia from Boissier came to me to-day by Express, from N.S. Obiotica?

Being written on big B. I could not send it by mail, and as I have a copy of Pl. Zeland. (pencil-marked - and d one of mine) to send to Parry, I make up a small parcel of the publications that have accumulated, & send by Express, as you will wish to have the Amst. right off.

To Gillman's Journal I could only send for May no. the rest of Parry's Polyspt. old. But shall fit up the rest right off now. & get my extra long letter July. I shall. Or send on your notes, etc, & shall, vita.

Yours of 24th March is here. Notes on Rudbeck I could not work in to the present Pamphlet article. But I will append to the next, or hang on to something else.

But, — as I do not see my way clear through the yet, I have sent to Philad.a for Nuttall's Originals as they are there, & to-morrow for the original of the R. Columbifolia — I shall track you through the whole, & see if you are all right, — If not, confer with you, before putting you into print.

I have injured my health by over-application, & must lighten up a little — uneasy feelings about where the heart should be. — perhaps of no consequence —

MISSOURI BOTANICAL GARDEN

"Brenthistium Argenti"
is labelled by Lesk. ips. as
"Fl. Bor. Ame." No locality
specified, nor collector — one of
his original materials.

Mixing leaves of this
sign & alla, I could not
will pick them out again.

BOTANICAL GARDEN
ENGELMANN PAPERS

As for Jaques, go ahead.
I am ready to give all I
have to put down the rebellion.
I go for giving the South
an opportunity for having
again the Union as it was,
if they will. If they
refuse, then grind them
to powder, — and will will
they deserve it, I would
keep it up — if they stand
out till I have every
rebel in to the Gulf, and
cleared the land of their
accursed presence!! —

Ann Arbor, Mich. April 21, 1862

My Dear Engelmann.

Your note, in answer as I told you, came a little too late to go into 2d part of Pl. Parry.

And since over, I felt in doubt about some things. So I retained them, and sent to Phila & to Torrey (who alone has the original of A. commoniflia) for the original specimens, as far as they are extant, and I am glad I did; for I suppose I must have had the original A. commoniflia of James &c. when Pl. Fendl. was a unity.

I will now look over the materials generally now in hand, with your note before me to see how it works.

H. E. Lake Creek S. Platte R. Platte below Forks S. Platte

E. compressifolia. What I have that is true and undoubted is the original sp. of James. Ht. Jour. Canadian R., Lt. Abert ... " Pole Creek to Cedar Bluffs. H. Engelmann. These are all just alike, and no mistake. The 1st has no fruit, - but the 2d & 3d supply it most fully clearly 2. capsule sessile, ovoid-oblong, turgid, only 4 or 5" lines long seeds oblong when not pressed in, - when they are pressed oval & truncate; thickly striate-costate, the ribs tuberculate, ~~but straight~~. You must have it from your brothers collection. Haydens specimens I seem not to have, but from your remark: "fruit only about 4 lines long," that = Engelmann's &. the original sp. of Torr. & Gray. Fl. N. Am. I. 637. to which specimens Engelmann's agree. 1070 ft. elevation. Missouri Botanical Garden George Engelmann Papers

Fendl. 222, which I referred to <u>conspicua</u>, is the same species, but with pod 3/4 inch long - still not "lineari-lanceolata" as you have it. Fred sent. - Thus far we agree. And Mitchell 1070 & 1069 are <u>not</u> conspicua. That is my blunder.

I can distinguish R. pinnatifida, but from R. alticaulis, but whenever I have the pods, - and guess at most without the fruit.

But I doubt if the shape of the petals holds well and also if R. alticaulis is really 4. They are all a sort of (1) (2) 4- as may be.

I will put your note, with a remark or two.

Parry, in a letter of June 11, — just received — has sent what I suppose is Pentstemon pumilus, Nutt.

Ellisia Nyctelea. Mr. Laming of Trenton, N. Jersey — or near there (& Thos. P. James of Philadelphia know) gets this. I guess Durand can get it also.

The seeds you sent of Es antirrhina did not come up. I could never be satisfied about these 2 species.

I have been too busy to pay Asaph Gray's lady Clark (his Lieutenant) was surprised when I said that the St. Louis people subscribing had not got vol. 3, Vol 4 is just out. I have not seen it — said to have

100 pages too much of the
letter-press — whereat the
publishers grumble — and
entire sons, threaten to
stop. I do not wonder,
Give A. opportunity, and
he would ruin any pub=
lisher,
God-night — The
rest of Yours queries pretty.
Tell W. B. I had
arranged — to give him a Sun
a characteristic day on
Cambridge — to dine there, Sy,
Sy, — But he left me in
the lurch,
Yours ever,
A. Gray

Dear Engelmann

Your Gooseberry —
letter of June 23, interests
me, and I slip it into my
Notes with Ribes, for
future reference — Print
your obs. remembrance.

I hope I can find some
of the Ribes you need,

Applemin septentrionale
is not so rare to N. Amer.
as you think (but is good)
See Mississ. Coll. N.
Mex. no. 2122. & Work
Sp. Fil. 3. p. 175.

I, too, had a pleasant
letter from Parry, — who
says you will keep me <u>au fait</u>

0 1 2 3 4 5 6 7 8 9 10

St Louis Jr 6th Sept. 62.

My Dear Engelmann

Parry's letter to Torrey, narrating his ascent of Pikes Peak has been in my hand. & is returned to him. Torrey says you want to ~~Send it to~~ have it to print at St. Louis: very well.

I am daily expecting the rev. of Bellinghams which contains your notice of Euphorbia & Cereus & the rest of Parry &c. — all but a Supplement — which — tho' it will not be issued till Nov. number, I am to have the extras at once. But I have not seen a

proof yet.

In that is a mission of Castilleia, which when you get one. I think, answer your queries about a spicy in a letter about Pamphreliaceæ, of June last

The enclosed slips will answer your queries about Grandiæ & Pentstemon

I have made a clear separation of Pentstemon. — will print it this autumn, in acad. Proceedings, June.

I have added extra-

issued with my notices
75 copies — enough
for us both. How
many shall I send to
St. Louis for you.

I think you owe
me a letter all this
while, but neither of
us have the heart or
the time to write me
the one just what is ne=
cessary, Nothing to do
but to work & fight. —
which we shall keep
doing if it takes 5 years
more.

Ever Yours

A. Gray

Dear E.

Yours of 29th ult. just
in. Your Gentiana from
the Chas. might well be
G. Ventricosa (in which
sense flower could not be
odd). — as figured in Bot.
Fl. Bor. Am. Mrs. Gray
in the morning will copy
the flower laid upon from
the plate.

Very sad to lose your
Euphorbias !! I hope they
will turn up.

I had time hardly to glance
at Parry's Pike Peak letter.

I share mine & mine
thought G. detonsa ran
back into G. crinita.

I have not answered
yours of Sept. 12. —
Of the two forms of
Pentstemon antirrhinoides,

one is Torrey's P. Thurberi,
R. R. Rept. 5. — which
Thurber has always thought
a diff. species.
But, on the strength of
specimens of Mrs Hitchcock's
& — & — I have kept it in
P. antirrhinoides" — as you
will see when my mss.
on Pentstemon is printed
= soon.

MISSOURI BOTA

Dear Engelmann.

Yours of the 1st inst.
with the formidable en-
closures from Parry, came
this morning.

As to Buckley there are
no "heart-burnings" or
"quarrelings" in the case.

I have long thought B, a
mean scamp, and so kept
him off, - but have always treated
him with consideration, - handled
him very gingerly before. But
when, after fair warning &
gentle entreaty, he wounded mut
his bravos, & when he had vio-
lated every scientific cour-
tesy, there was nothing left
but to snuff him out. But
I cannot condescend to feel
the least malice against him

As to the imbroglio between Parry & Bull, it is sad, and I have an unenviable job on my hands.

I received a few weeks ago a letter from Bull — nothing objectionable in it.

I must insist, if I have anything to do with it, that the plants shall be so brought in to market as not to be competing against each other, at least to Parry's disadvantage. — But I cannot judge at all till I receive a set of the collection made on the plains & up to July 20th — I feel very sadly about it

The Appendix to Parry.
Enum. makes 12 or 13
pages. I have read a
proof, but expect a revise —
— will get it out as soon
as I can.

In Yucca species. — I
did not know — or remember —
that I had struck out any
thing. — A slip, perhaps.
Sorry for the misprints
in Euphorbiaceae article —
Difficult to avoid, as I
see but one proof — always
full of typographical errors —
and the printing is not fair
W.

Thanks for the Corydalis
crystallina. Did you not
once call it Fumaria?

Yours ever
A. Gray

Rec'd Oct 15th 14
Ans Nov 8th

Cambridge. 14th Oct, 62.

Dear Engelmann.

Yours of Nov 8th is in, and I look to Gray —

There of A. nigra (in specimens, mine on our trees — the one before the door cut down long ago) are lateral & subsessile or nearly sessile — no leaves on the ~~branch~~ axis that bears them, — all N — and so Michx. f. figures them, also Lambert

This alba from Montmorency has the cones terminating leafy branches 1/3 — 1/2 inch long.

" " from Rocky Mts. branches 1½ — 2½ inches,

so far so good

MISSOURI BOT
GEORGE ENG

But single specimen
from L. Superior (N. Side)
has them from lateral
not
~~basile~~ basilar buds —

answering to Michaux's
figure. — and answering to
Lambert's fur better
figure — in which
the Cone bearing buds ~~is~~ are
~~base tuft~~ one of them
terminal, but the others
lateral,

In this fur. the
character does not clearly
hold out.

Banksiana dentosa
crinita — I fear one
to gather. Some about 5,
alata?

TANICAL GARDEN
ELMANN PAPERS

Never mind Lincoln
It will come out right.
I go against the abo=
lition wing. — but
support the President
in his Proclamation.

If the rebels continue
obstinate that is only
a question of time. —
Of that — as a military
measure — & of the
expediency the President
of the U. S. is the sole
judge. — and in time
of war, he is to be sup=
ported heartily. I do
not see myself clearly
that the time had come.
But I have a notion
that the President knows
better than I. —

0 1 2 3 4 5 6 7 8 9 10
cm

MISSOURI BOTANICAL GARDEN

So you like Judge Parker. I will send you an article written before the Proclamation came out, you will like it — all but the last point — the letter end. I would entire the war — if necessary — to the sweeping up of all subeldom base. And that appears to be the sober sentiment of the country. If Judge Parker & had let that convention alone — we would have ousted Sumner for a wiser man. But now I fear that Sumner will be returned to the Senate.

You had better in Missouri abolish Slavery & take N.S. hands in in Kansas & you will never [illegible] it better.

E. Gray

Nov. 21, 1872

Dear C.

I have decided that Parry must stick to the written contract he signed in — and he accepts the award.

Prof. Lawson, of Queen's College, Kingston, Canada W. has agreed to communicate with you and furnish Abies — of all sorts. Since then a little skipper fellow, l'Abbé Brunet, who has been in Paris a year or two to qualify for Professor of Botany in Laval University Quebec, has found here

on his way home. And he says he will help you. Write him

Phacelia parryi

I believe, — I see that it is the Franklinii only in bigger, mean.

Sure for yours of 8th inst.

"Abies nigra clear to

A. Menziesii" — Well

that is repeating "Leaves variable two" — I don't doubt it.

Set a cone on the shies of the Garden this year.

Parry has sent part of his seed, & a selection of specimens, nothing new

MISSOURI
GEORGE

MISSOURI BOTANICAL GARDEN

except your Gutiana
ciliodata — And name
being next ciliata &
shall to have names ex=
posed.

See if Shaw will
buy up a lot of Pamp
brinfice seed. And
all the rest I will send
abroad — just to Worker —
& all he does not want
to Stevens to sell at auc=
tion — which is the way
seeds are generally sold
I learn.

It is time to — night
to pay back your
loans. — My time will
come presently.
I wrote from Gary
Came a few days ago.

RI BOTANICAL GARDEN
ENGELMANN PAPERS

MISSOURI BOTANICAL GARDEN

I had to mark dead,
and reject — to go
page in a letter, but
voila tout.

You are a very good
sort of man, and an
excellent botanist —
but your Secesh —
anti-national proclivities
are abominable —
Another Boston lawyer
has a pamphlet as big
as Q of Brutus, & written
before that was out —
& this uses up Brutus
in advance — completely

Good night

A Gray
